

E) Given two string

str1="C++";

str2="interesting";

1) Use the string class in C++ to append str2 to the end of str1 and store the result to str3.

2) Compare the str3 with str1 and print the comparison result.

1. MUSIC

2. MATLAB

parameter

1x4

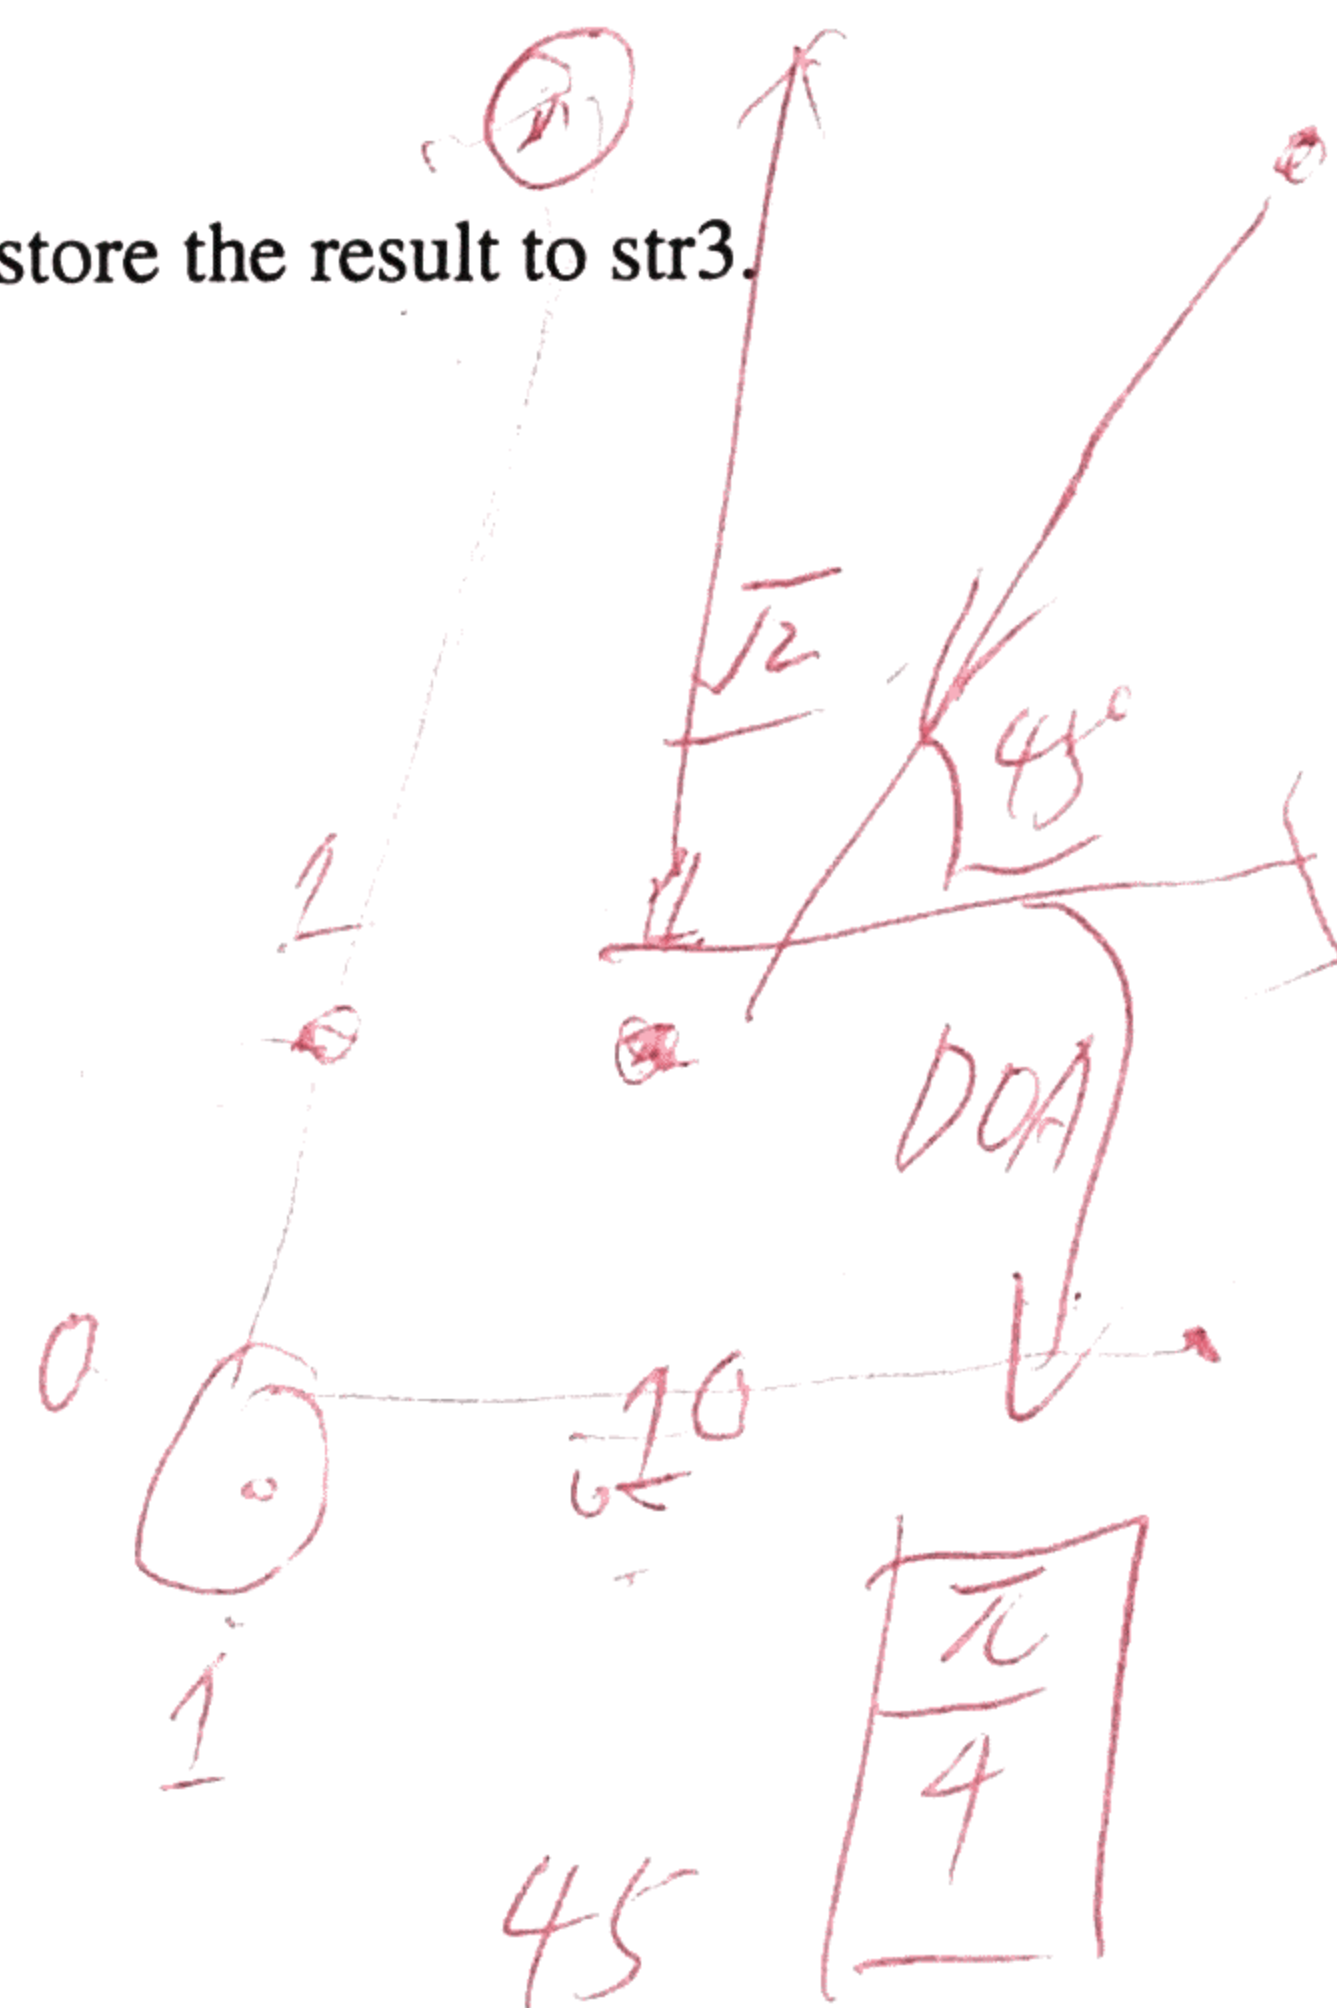

① [0 1 1 1] vector

② [1 0 1 1]

③ [1 1 0 1]

④ [1 1 1 0]

conclusion

E) Given two string

str1="C++";

str2="interesting";

- 1) Use the string class in C++ to append str2 to the end of str1 and store the result to str3.
- 2) Compare the str3 with str1 and print the comparison result.
